Mobilehome Park Utility Upgrade Program

FEBRUARY 1, 2016 Report

1. Executive Summary

On March 13, 2014, the California Public Utilities Commission (“Commission”) approved and authorized Southern California Gas Company (“SoCalGas”) to execute the *Mobilehome Park Utility Upgrade Program* (“Program”) through D.14-03-021 (“Decision”). The Program is a three-year pilot (2015-2017) to convert master-metered/sub-metered natural gas and/or electric services to direct utility services for qualified mobile home parks and manufactured housing communities (collectively “MHPs”).

In accordance with Ordering Paragraph 10 of the Decision, this report provides information on: (1) SoCalGas’ current Program timeline for implementation of the three-year pilot; (2) SoCalGas’ progress on that timeline; (3) the number of the initial applications received by SoCalGas; (4) problems experienced with the prioritization process, and potential, future solutions; and (5) information on MHPs selected for conversion including general location, total spaces, utility services converted, and whether the conversion involved other utilities or other municipal or public agency provider.

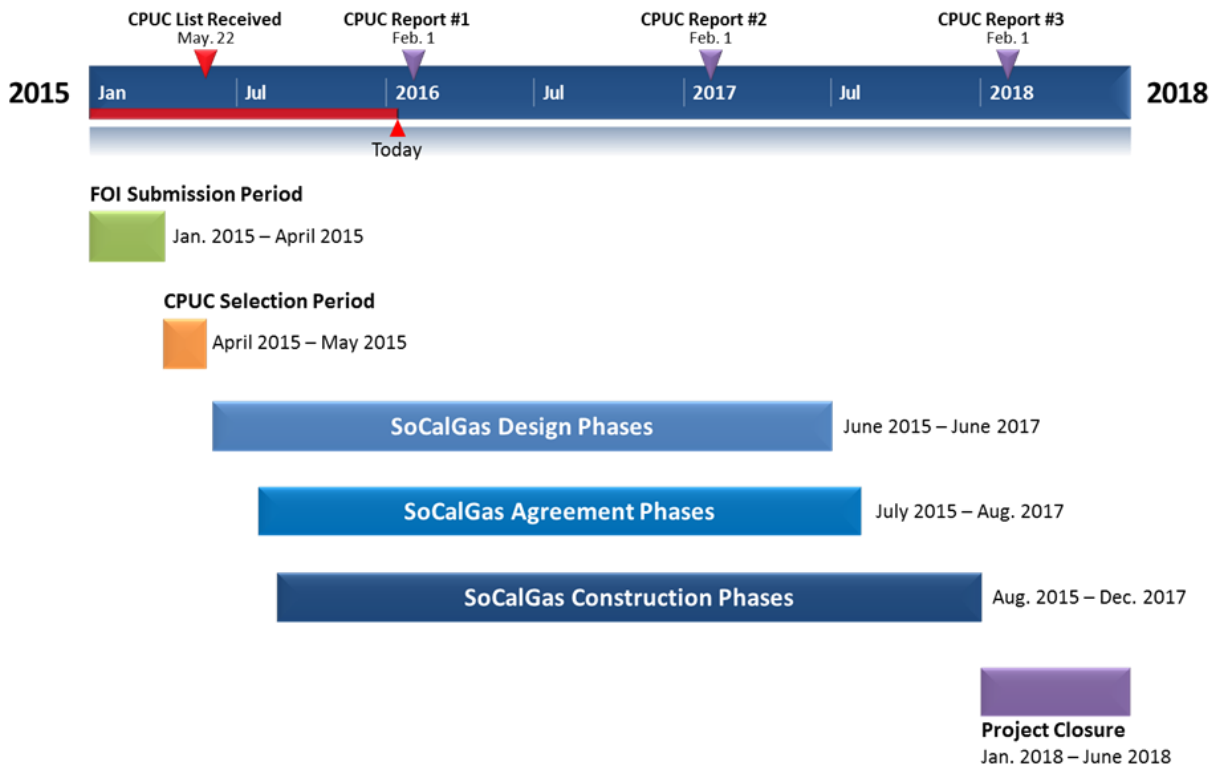

With approximately 80 percent of SoCalGas’ eligible MHPs submitting initial applications, it appears that the Program was well-received by the vast majority of eligible MHPs. SoCalGas also believes that its effective outreach efforts across its service territory to educate approximately 1,200 eligible MHPs on the program contributed to a successful initial solicitation of interest. In May 2015, the Commission’s Safety and Enforcement Division (“SED”) prioritized all the MHPs that submitted Forms of Intent (“FOIs”), and provided SCG with a list of 232 MHPs for conversion. Although SoCalGas is moving as expeditiously and prudently as possible, converting over 230 MHPs with approximately 13,000 service points in a little over 2 years is an aggressive schedule. At a high level this requires SCG to reach out to over 230 MHPs, complete and execute detailed applications, obtain qualified contractor resources to complete the To-the-Meter (“TTM”) work, educate the MHP owners and their contractors on the “Beyond the Meter” (“BTM”) construction element of the Program, execute final agreements, complete over 230 natural gas MHP designs, acquire easements from the over 230 MHPs, construct natural gas distribution systems with approximately 13,000 service points at times when it is convenient to residents, secure inspections from the Department of Housing and Community Development (“HCD”) and/or the local jurisdictions and establish service to nearly 13,000 new utility customers.

In general the prioritization process worked well, a few adjustments were needed with MHPs that crossed multiple service providers. These adjustments were resolved with the direction of the Commission’s Safety and Enforcement Division (SED) to ensure consistency with their selection.

2. Program Timeline and Where SoCalGas is on the Timeline

The Program has been planned to achieve the conversion, on a combined TTM and BTM basis of 10% of the estimated spaces in SoCalGas’ service territory, which represents approximately 12,800 spaces. The Commission’s SED provided SoCalGas with a list of 232 MHPs to convert, which represents approximately 13,439 spaces. To reach the Program’s goal, SoCalGas developed the timeline shown in Figure 1 (“Timeline for Implementation of Three-Year Pilot”) noting that, where possible, dual conversions (natural gas and electric) have been planned through joint efforts with impacted electric service providers. Additionally, joint trenching opportunities may be shared with the MHP’s existing telecommunications provider(s).

FIGURE 1. TIMELINE FOR IMPLEMENTATION OF THREE-YEAR PILOT.

A number of assumptions are inherent in the Schedule, specifically; it assumes that there are no constraints which may prevent the MHP’s participation in the Program, such as the MHP owner’s ability and willingness to move forward with a detailed application, execute the Program Agreement, grant the required easements, secure a qualified BTM contractor, finance the BTM construction activities as necessary and meet the prescribed program schedule. The timeline also assumes that the total number of MHP spaces indicated on the FOI completed by the MHP owners is accurate. Further assumptions include, but are not limited to, the ability for a joint schedule to be developed, acceptable, and executable by all impacted utilities where shared territory requires joint construction. Also, the schedule is dependent on availability of both TTM and BTM contractors having qualified crews to perform construction and HCD and/or other jurisdictional agencies having available trained resources to perform timely inspections on completed portions of the projects. As of November 30, 2015, SoCalGas has processed all the selected MHPs through the Detailed Application phase. SoCalGas is in the beginning

phases of planning and construction, and the Schedule is expected to continue to change throughout the Program's life based on the factors discussed previously and as MHPs decline or opt to participate.

3. Program Participation Detail

Beginning in the fourth quarter of 2014 and through Q1 2015, SoCalGas continued to promote the Program and encourage MHP Owners/Operators to complete and submit a FOI consistent with the Outreach Plan reviewed by the Commission. The FOI is also referred to as "Initial Application" and denoted the MHP Owner/Operator's interest in inclusion in the pool of potential candidates for participation in the Program. The selection of MHPs was performed by the Commission's SED. SoCalGas received a total of 970 *initial applications*, or FOIs, during the approved submission period of January 1, 2015 through April 1, 2015; the total FOIs received represent 82.5% of the total eligible MHPs in SoCalGas' service territory.

The SED selected a total of 232 MHPs in SoCalGas' service territory comprising an estimated total 13,439 spaces for conversion as shown in Appendix A, Commission's SED Selection of SoCalGas MHPs. Of the 232 MHPs, a total of 28 MHPs have dropped out of the program for a number of reasons including deciding not to participate in the program, failing to submit the Detailed Application or not meeting the eligibility requirements of the program.

4. Problems Experienced with the Prioritization Process and Potential Future Solutions

On May 22, 2015, SoCalGas received from the Commission, a list of selected MHPs selected by SED. SoCalGas did not experience any significant issues or problems with the prioritization process or priority order. In a few cases, there were some MHPs that appeared in SoCalGas' list selection but not in PG&E's and vice-a-versa and one discrepancy in SDG&E's territory. The disposition of these was quickly clarified by SED and the program proceeded uninterrupted. SoCalGas has no potential future solutions to the prioritization process at this time.

5. Conclusion

SoCalGas has found that its outreach strategy and related activities have proven effective in successfully increasing awareness of the Decision resulting in high MHP participation in the Program. SoCalGas recognizes that there remain several other factors which will influence the timely and successful completion of the Program's goals including, but not limited to, an aggressive completion schedule shared with other IOUs, as well as MHP owner's willingness and timeliness to provide and complete the necessary documentation, and the availability of contractor and inspecting authority resources needed for the Program's execution. SoCalGas will continue to monitor and attempt to mitigate potential factors as they are identified.

Additional Program information can be found online on SoCalGas' website at
