September 10, 2015

Mr. Kenneth Bruno Program Manager Gas Safety and Reliability Branch Safety and Enforcement Division California Public Utilities Commission 320 W. Fourth Street, Suite 500 Los Angeles, CA 90013

Dear Mr. Bruno:

The Safety and Enforcement Division (SED) of the California Public Utilities Commission conducted a G.O. 112-E Operation and Maintenance Inspection of Southern California Gas Company's (SCG or SoCalGas) Cathodic Protection (CP) Facilities in the Mid-City (Inspection Unit) on May 4-8, 2015. The inspection included a review of the Inspection Unit's cathodic protection and odorant records for calendar years 2013 and 2014 and random field inspections of pipeline facilities in the Belvedere, Juanita, and Hollywood districts. SED staff also reviewed the Inspection Unit's Operator Qualification records, which included field observation of randomly selected individuals performing covered tasks.

SED staff identified one probable violation of G.O. 112, Reference Title 49 Code of Federal Regulations (CFR), Part 192 during the course of this inspection. SED also made two recommendations and several observations during the course of this inspection. These are described in the Summary of Inspection Findings enclosed with this letter.

Please feel free to contact me at (213) 305-8660 if you have any questions or need additional information.

Sincerely,

W. Jeff Koskie

Cc: Lam, Willard Tong, Kan Wei Epuna, Matthewson

### Summary of Inspection Findings 2015 SCG Mid-City LA Inspection May 4-8, 2015

#### I. SED Identified Probable Violations

### Title 49 CFR Part 192, Section 192.465(d) – External Corrosion Control: Monitoring

"Each operator shall take prompt remedial action to correct any deficiencies indicated by the [external corrosion control] monitoring."

The May 19, 1989, Federal Pipeline and Hazardous Materials Safety Administration's (PHMSA) Inspection Guideline and Interpretation #PI-89-006 for 192.465(d) states that, as a rule of thumb, PHMSA interprets "prompt" as having the "correction completed by the time of the next scheduled monitoring".

SED found numerous Cathodic Protection (CP) packages to be deficient for intervals exceeding SCG's routine monitoring frequency defined in SCG Gas Standard 186.0135, and as required in 49 CFR §192.465(d). The CP Packages are listed in Attachment A and Table 1 below.

SED recognizes that in some instances, factors outside of SCG's control may be the cause of delay for restoring deficient CP packages (i.e. environmental, permitting, moratoriums, etc.). However, SED observed the cause of delays for the locations in Table 1 to be within the control of SCG. For example, CP technicians would list "not enough time to troubleshoot package" for action taken or "area needs new anodes" yet the lengthy installation of new anodes does not restore the CP package. SED believes the delays in restoring CP deficiencies were manageable by SCG and therefore violations of CFR 192.465(d).

Table 1. Deficient CP Packages

District	Area	Date Deficiency Identified	Date noted CP Package submitted to SCG planning department	# of Days Deficient
Belvedere	C0405E-7	4/11/2012	4/26/2013	1101
Hollywood	ADA038-4	11/13/2013	1/12/2015	520
Hollywood	BEV119-5	5/22/2013	9/5/2014	695
Hollywood	BEV067-3	9/18/2012	1/23/2014	941
Juanita	SIL044-1	11/29/2012	1/23/2013	869
Juanita	SIL042-1	9/23/2011	2/28/2012	1302

Provide SED with a status update on the remediation of the CP packages listed in Attachment A and Table 1 above.

 Table 1. Deficient CP Packages

District	Area	Date Deficiency Identified	Date noted CP Package submitted to SCG planning department	# of Days Deficient	CP Area Status	Response	Corrective Action	Estimated Completion Date
Belvedere	C0405E-7	4/11/2012	4/26/2013	1101	DOWN	9/2/2015 CP Area out of tolerance (OOT) •8/4/2015 Interference anodes have been installed, but CP Areas still OOT •Recorded all ECS outputs. •Notification 100007390918. Order 520001156514.	Next Steps:  • Continue to troubleshoot CP Area to determine what is impacting the CP Area to be OOT.  • Identify whether there are any additional interference or shorts in the area.  •Determine whether more anodes need to be installed to bring this area within tolerance.	December 31, 2015, dependent upon the length of time it takes to troubleshoot the area to identify the problem that is causing the area to be OOT.
Hollywood	ADA038-4	11/13/2013	1/12/2015	520	DOWN	8/13/2015 CP Area OOT pending anodes.  •Work Order-# 54-27174.  • Notification 100007405258.  •Order 520001149873.	Next Steps:  • 8/31/2015 OMOs sent to Contractor for the installation of multiple anodes.  •Estimated Date for Contractor to complete anode installation is 9/30/2015.	October 31, 2015, to get anodes installed and SPS to take reads after the anodes have been installed, so that the CP Area is within tolerance, and no other issues arise in CP Area.
Hollywood	BEV119-5	5/22/2013	9/5/2014	695	UP	6/1/1205 CP Area within tolerance	•6/1/2015 Order 540000031558 completed. •Installed anodes within CP Areas, which brought the area within tolerance.	
Hollywood	BEV067-3	9/18/2012	1/23/2014	941	UP	5/9/2015 CP Area within tolerance	•3/24/2015 Work Order 540000009671 completed. •Read point was exposed due to casing being paved over. •5/6/15 Reconnected ECSs. •5/9/15 100mv shift completed.	
Juanita	SIL044-1	11/29/2012	1/23/2013	869	UP	6/30/2015 CP Area within tolerance Short cleared at MSA.	<ul> <li>•6/09/2015 Installed new anodes in CP Area.</li> <li>•Found reads were much lower than when troubleshooting was performed and required for anodes submitted on 5/2/15.</li> <li>•Troubleshooting performed, found and repaired short.</li> <li>•Verified CP area is within tolerance after short cleared.</li> <li>•Order 520001141582.</li> </ul>	
Juanita	SIL042-1	9/23/2011	2/28/2012	1302	DOWN	9/2/2015 CP Area Out-of-Tolerance (OOT)	<ul> <li>7/31/15 Capital phased project still pending. 8/28/15 5 of 7 OMOs completed.</li> <li>WRs received permits 8/12 and Contractor had installed anodes (5 Orders Completed)</li> <li>Waiting upon 2 remaining permits for WRs to install anodes</li> </ul>	December 31, 2015 to get anodes installed and SPS to take reads after the anodes have been installed to ensure that the CP Area is within tolerance and no other issues arise in CP Area.

#### II. Concerns, Recommendations, and Observations Summary

1. During a 5/6/15 visit to 3632 West 6<sup>th</sup> Street and South Harvard Boulevard in Los Angeles, SED observed heavy atmospheric corrosion on the aboveground piping and fittings on the meter assembly during a pipe to soil reading. SCG recognized the concern and remediated the atmospheric corrosion within a week of the field visit. This note serves as a record of the observation.

Response: A work order was issued to replace manifold.

Corrective Action: Order 52-1109991 was completed on June 9, 2015.

2. During a 5/5/15 field visit to 312 N 4<sup>th</sup> Street in Los Angeles, SED discovered a meter assembly with insufficient protection from vehicle impact. The meter assembly is located adjacent to the residence's driveway, exposing the meter assembly to a risk of impact. Meter protection was currently installed; however, it was not placed in the location most likely to experience impact damage. SED recommends SCG install meter protection in the location that offers the most protection from vehicular impact. Provide SED with an update on SCG's actions at this location.

Response: OMO issued to install four-inch guard post to protect MSA.

<u>Corrective Action</u>: OMO sent to planning on August 14, 2015. On September 3, 2015, Work Order# 54-54874 was sent and set ready for dispatch.

3. During a 5/6/15 field visit to 6341 Lindenhurst Avenue in Los Angeles, SED discovered the regulator vent piping of the meter assembly did not extend far enough outside to allow any escaping gas to vent to atmosphere in the event of a regulator failure. SED recommends SCG extend the regulator vent piping away from the crawl space minimize the risk of any gas accumulation in the event of a regulator failure. Provide SED with an update and photo(s) of the remediation at this location.

<u>Response</u>: Unscheduled work order was generated to vent regulator piping of the meter set assembly.

<u>Corrective Action</u>: Regulator vent piping was extended by SPS on unscheduled work order, which was completed on May 7, 2015. (See photograph.)

4. During a 5/6/15 field visit to 350 South Mcarty Drive in Los Angeles, SED discovered the service riser bypass and shut-off valve buried in a newly poured concrete slab walkway. The contractor responsible for pouring the concrete slab and preventing access to the shut-off

valve was present during the field visit. SCG planned to schedule a follow up visit to ensure remediation of the buried riser bypass and shut-off valve. Provide SED with an update and photo(s) of the remediation at this location.

Response: Order was issued to the field to raise buried service riser bypass and shut-off valve.

<u>Corrective Action</u>: Order # 52-108963 to raise buried service riser and bypass was completed on May 28, 2015. (See photograph.)

During field visits to CP read locations (read points), SED observed numerous read points to still have deficient levels of cathodic protection since the last read date or to currently have deficient levels of cathodic protection since an adequate last read. Table 2 outlines the read points observed during the field visits. Provide SED with an update on the remediation of each deficient read location listed in Table 2.

## Response and Corrective Action:

SoCalGas recognizes the need to reevaluate its CP policies and procedures. SoCalGas will be implementing changes to address the long-term Down Areas while developing a proactive approach to the CP areas. This will begin with establishing clear goals and expectations for prompt troubleshooting and reasonable remediation timelines. SoCalGas will continue to update SED as changes are implemented to improve the process. Provided below is an update to the CP Areas of concern and estimated completion dates.
